

# Julian R. Grossman

AI ENGINEERING • DATA SCIENCE • ENTERPRISE AUTOMATION

julianrgrossman@gmail.com | +1 (610) 715-3333 | Havertown, PA | [linkedin.com/in/julian-grossman-1b24052b8](https://www.linkedin.com/in/julian-grossman-1b24052b8)

## EDUCATION

**Pennsylvania State University** - B.S. Computational Data Science | Expected May 2027 | Cumulative GPA: 3.0

**Relevant coursework:** Artificial Intelligence, Data Structures & Algorithms, Data Science I-IV, Statistical Reasoning, Computer Science I-IV, Statistics in R, Calculus I-III, Discrete Math, Matrices, Data Ethics

## TECHNICAL SKILLS

**Languages & frameworks:** Python, C#, .NET Framework, SQL

**AI & automation:** LLMs, Ollama, n8n, Model Context Protocol (MCP), OCR, Vision-Language Models

**Cloud & DevOps:** Azure DevOps, Microsoft Azure, Azure Key Vault, Kubernetes, Docker, CI/CD

**Data & integrations:** Snowflake, SQL Server, Redis, Microsoft Graph, REST APIs, Pandas, RapidFuzz

## INTERNSHIP EXPERIENCE

### **Pennsylvania Compensation Rating Bureau (PCRB) - AI Engineer Intern**

*Summer 2026 | Philadelphia, PA*

- Engineered an AI-powered Azure DevOps governance and reporting platform in Python using locally hosted LLMs; analyzed work items, releases, deployments, commits, and pull requests to produce business summaries, workflow insights, and deployment-risk reports.
- Deployed privacy-preserving, on-premise inference with Ollama, Docker, Kubernetes, and Redis, including multi-replica model serving, request distribution, and concurrency controls that kept company data off external AI services.
- Integrated C#, .NET Framework, Azure Key Vault, Microsoft Graph, and Azure DevOps REST APIs/WIQL with certificate-based authentication and configuration-driven secret retrieval for secure enterprise automation.
- Built software-delivery and ticket-lifecycle compliance analytics that detected skipped states, reopened tickets, missing artifacts, approval and sign-off gaps, rollback signals, and recurring failure patterns; linked AI-generated explanations to engineering evidence.
- Designed an agentic payroll-audit and document-processing workflow using n8n, MCP, OCR, and VLMs, with PII redaction/restoration, human-in-the-loop review, and feedback routing between specialized local agents and internal systems.

### **Pennsylvania Compensation Rating Bureau (PCRB) - Data Science / Actuarial Research Intern**

*Summer 2025 | Philadelphia, PA*

- Improved address and branch matching accuracy by 4% with scalable Python pipelines using Pandas, RapidFuzz, and regex for standardization and fuzzy matching across millions of records.
- Built traceable validation and anomaly-detection workflows; queried, validated, and transformed large datasets using Snowflake, SQL Server, and SQL.
- Proposed spatial reconciliation, REST API validation, and Microsoft Azure automation approaches to improve long-term data quality; several recommendations moved into implementation.

## ACTIVITIES

- **Ri3D Club:** Built a functional robot in 72 hours for the annual FIRST Robotics challenge.
- **Nittany AI Society:** Participate in AI workshops, hackathons, and applied machine-learning activities.
- **Nittany Cloud Association:** Gain hands-on exposure to Azure, AWS, and Google Cloud platforms.
